

Winterizing Kit Instructions

- 1) Do not winterize your pool until the water is clear, properly balanced and free of algae.
- 2) Operation of the filtration system is recommended during treatment
- 3) Add the chemicals separately as follows:
 - Winter Algaecide 20- Add 2 quarts of this product per 30,000 gallons of pool water. This dose helps provide a measure of control of algae growth during the winter months.
 - Winter Clear at a rate of 2 quarts per 30,000 gallons of pool water by pouring directly into pool. Run filter continuously for 48 hours.
- 4) Cover pool if possible.
