Precautionary Statements
on Back Panel.

ITEM NO.
L10045BA

This product represents the latest generation in water clarification. Pool owners will find filters last longer and operate better. It may be applied while pool is in use. This product is a cationic polymer that will coagulate and floc suspended particles from swimming pool water, while adding no solid residues of its own. The floc that is formed may readily be filtered from the water by conventional filtering systems.

DIRECTIONS FOR USE

Backwash the pool filter before adding This Product. Add the required amount of This Product to a plastic watering can, fill with water, and add to the pool at the point of maximum agitation. Run the pool filter for 8 hours after adding This Product, and then vacuum any residue. For weekly maintenance, add 5 ounces of This Product per 5,000 gallons of swimming pool water. For opening the pool or if pool water is extremely turbid, add 10 ounces per 5,000 gallons of water and run the filter longer.

NOTE: Be sure to follow directions. Do not over apply as that may hinder the products effectiveness. It is not necessary to adjust pH of the swimming pool water before or after using this product. The performance of this product is not affected by chlorine.
