

**50** lbs.  
(22.68 kg.)

**ITEM NO. 4151**

L89147-U

- Use with any type or size pool.
- Angular shape of grain traps smaller particles.
- Uniformly sized to meet the specifications of major filter manufacturers.
- Ecologically safe, odorless, non-staining and non-corroding.

***Directions:***

Remove all used sand from your filter. Fill the tank with Robelle Pool Filter Sand to the level recommended by the filter manufacturer. Pack the sand carefully around internal elements to prevent damage to your filter. Backwash the filter for at least 30 seconds before filtering the pool water with new sand. For best results, replace your filter sand every year.
